Career Objective

Aspiring Software Developer with expertise in MERN stack development seeking challenging opportunities to build scalable, user-centric web applications. Committed to leveraging strong problem-solving skills, technical proficiency, and passion for innovation to contribute meaningfully to dynamic development teams and deliver impactful solutions.

Education

Bachelor of Technology in Computer Science Engineering

2022 – 2026

Parul University

CGPA: 8.12/10

Higher Secondary (Class 12th)

2021

UP Board

Percentage: 77%

Secondary (Class 10th)

2019

UP Board

Percentage: 85.83%

Technical Skills

Programming Languages: C, C++, JavaScript (ES6+)

Frontend Technologies: HTML5, CSS3, React.js, Bootstrap, TailwindCSS, Responsive Web Design

Backend Technologies: Node.js, Express.js, RESTful API Development

Databases: MongoDB (NoSQL), MySQL (RDBMS)

Developer Tools: Git, GitHub, VS Code, Postman, npm

Additional Skills: JWT Authentication, Passport.js, Cloudinary, Razorpay Payment Integration

Projects

Healthcare Management System | MERN Stack, JWT, Machine Learning

Aug 2025 – Oct 2025

- Engineered full-stack healthcare platform using MongoDB, Express.js, React.js, and Node.js with role-based dashboards for patients, doctors, and administrators
- Integrated Machine Learning models for predictive disease diagnosis (diabetes, thyroid) and implemented real-time messaging system for seamless patient-doctor communication
- Implemented secure JWT-based authentication with role-based access control (RBAC) and developed responsive UI using React.js and TailwindCSS

E-commerce Shopping Web Application | MERN Stack, Razorpay, JWT

Feb 2025 – Apr 2025

- Developed scalable e-commerce platform featuring product catalog, shopping cart functionality, and secure checkout process using MERN stack architecture
- Implemented JWT-based user authentication, admin dashboard with full CRUD operations, and integrated Razorpay payment gateway for secure transactions
- Designed responsive React.js interface with efficient state management and optimized Express.js backend APIs for seamless data operations

Wanderlust – Travel Booking Platform | MERN Stack, Passport.js, Cloudinary

Oct 2024 – Dec 2024

- Built comprehensive travel booking platform with destination exploration, booking system, and user review functionality using MERN stack
- Implemented secure Passport.js authentication with session management, complete CRUD operations, and Cloudinary integration for optimized image handling
- Developed mobile-responsive React.js interface with Bootstrap styling and RESTful APIs using Express.js and MongoDB

Certifications & Achievements

Computer Networks – NPTEL (Score: 78/100)

Theory of Computation – NPTEL (Score: 65/100)

Internet of Things (IoT) – NPTEL (Score: 77/100)

PU CODE 2.0 Hackathon – Certificate of Participation

Active problem solver on LeetCode with consistent practice in Data Structures and Algorithms
